Crime Fighter BEAST
Quality Management System - Document Control

About Porter Lee Corporation

Porter Lee Corporation has been in business for more than 10 years providing forensic LIMS and evidence handling software and services. We serve only the forensic and law enforcement communities. Our product was born in the crime lab and police property room. From the beginning, the entire product line has been designed to facilitate the collection and preservation of forensic evidence, provide an unbreakable chain-of-custody record, and enhance the day-to-day efficiency of the agencies in which we operate.

Our evidence tracking package is in use with more than 300 state, county and municipal police agencies across America and internationally. Porter Lee Corporation is ISO certified to the ISO9001:2000 standard.

Crime Fighter BEAST

The Crime Fighter BEAST (Bar coded Evidence Analysis Statistical Tracking) system is a Laboratory Information Management System (LIMS) specifically designed for forensic crime laboratories and medical examiners. Extensions and configuration of the system allow the LIMS to reach into every section of the lab as well as linking the lab to submitting agencies. The QMS Module is another example of the BEAST's product depth.

Major Features

Some of the major document management features of the QMS Module are listed below:
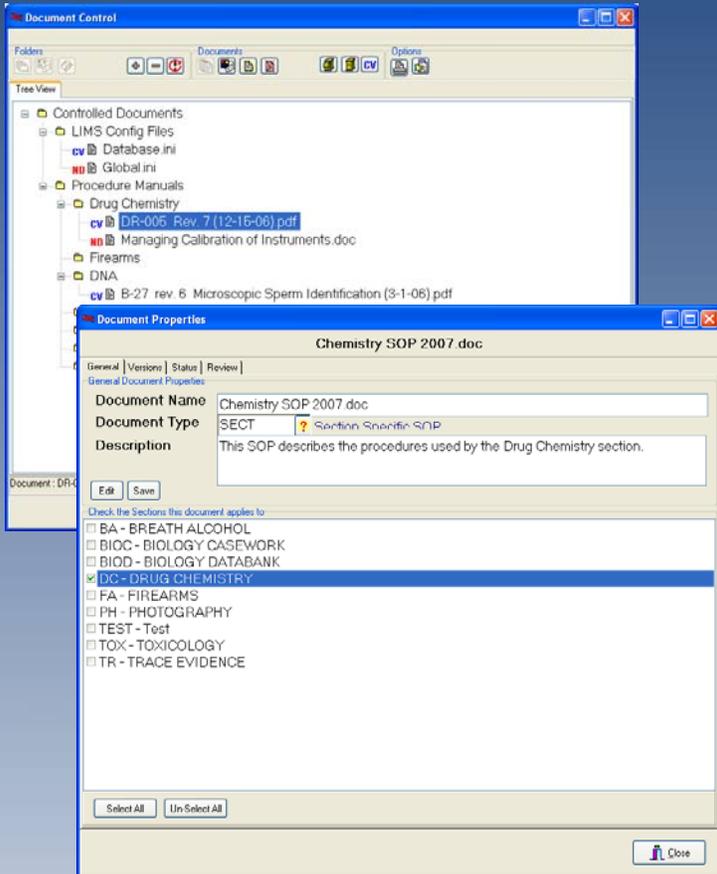

- Manage Multiple Document types (Word, PDF, TIFF, Others)
- Check Out / Check In Functions
- Revision Control
- Document Publishing
- Tracks history and Archives Obsolete Versions
- Document Review and Approval
- Link Directly to the Crime Fighter BEAST LIMS

PORTER LEE Corporation

Quality Management

- **LIMS Integration**
- **User Configurable**
- **Designed for ASCLD –LAB Compliance**
- **Complements Porter Lee LIMS Offerings**

## Document Management—Version Control

Crime Laboratory Integration

Working together, your QMS system and the LIMS provide a complete approach to quality management, evidence tracking and reporting from the time of collection, through forensic analysis, return, and final disposition. For police agencies with their own internal labs, the BEAST can be used to enhance workflow by managing lab assignments, recording results and providing templates for writing analysis reports.

Masterful Document Management

Virtually any type of document can be fully managed from within the QMS system. Version management, access control and the ability to designate the interested parties to a document. Document Type Codes enable you to create system behavior that is specific to a document type (Material Safety Data Sheets may be treated differently than Standard Operating Procedures).

LIMS Integration:
Chemistry SOP Being Accessed from Within the Crime Fighter BEAST LIMS
